Project Manager Medical Devices (m/f/d)

Company
PROMEDIX GmbH

Beginning of employment
now

Duration of employment
permanent

Job Location
Stubenwald-Allee 21, 64625, Bensheim
Remote work possible

Date posted
1. December 2023

Description

Your tasks will be as diverse as the challenges with which our customers present us. You will take on a central role in our customer's development projects: creating project plans, planning the necessary resources (personnel, time, costs), coordinating project teams, steering project development and bringing your expertise to bear on technical issues. You will identify project risks and develop pragmatic alternatives, ensuring that project goals are met.

Our customers are market leaders in medical device development. Due to the high complexity of their specific projects, these are often long-term, and we are frequently involved in projects from the planning phase through to market launch.

Your Qualifications

Would you like to take the experience and know-how you have acquired in practical development work and apply it to ambitious medical technology projects that will help you expand those skills further? Are you familiar with the basics of medical device quality and risk management as well as the registration process for medical devices? If you value teamwork, enjoy solving interdisciplinary problems, and have a strong command of English, then we would like to get to know you.

Our offer

You can look forward to working with a highly motivated, open team and to the advantages offered by a young, fast-growing company, where decision-making is approached efficiently and flexibly. Good earning opportunities, additional financial benefits, a business vehicle and independence from rigid hierarchical structures await you!

Contact

Please send your complete application documents including your salary expectations and earliest start date by e-mail to:
